## Implication Chart Exercise

Use the implication chart method to minimize our previous partitioning example. Then rewrite the new state table.

| Present <br> state | Next state |  | Output <br>  <br>  <br>  <br> $w=0$ |
| :---: | :---: | :---: | :---: |
|  | $\mathrm{~B}=1$ | B |  |
| B | D | F | 1 |
| C | F | E | 0 |
| D | B | G | 1 |
| E | F | C | 0 |
| F | E | D | 0 |
| G | F | G | 0 |

## Implication Chart Exercise

## Initial Setup

C

## First Pass

(2)

## Second Pass

## Third Pass

## Final State Table

Applying this info:

- $A$ is equivalent to $D$
- $C$ is equivalent to $E$ and $G$
- E is equivalent to G (matches above)

| Present state | Next state |  | Output <br> z |
| :---: | :---: | :---: | :---: |
|  | $w=0$ | $w=1$ |  |
| A | B | C | 1 |
| B | D | F | 1 |
| C | F | E | 0 |
| D | B | G | 1 |
| E | F | C | 0 |
| F | E | D | 0 |
| G | F | G | 0 |

| Present <br> state | Next state |  | Output <br>  <br>  <br> $\mathrm{w}=0$ |
| :--- | :---: | :---: | :---: |
|  | $\mathrm{D})$ | B |  |
| B | A | F | 1 |
| B | $\mathrm{EG})$ | F | C |
| F | C | A | 0 |
